Garam Kim

AI Native Software Engineer

A developer who defines the problem.
I find friction in everyday work and build solutions with AI.

EXPERIENCE

MOAI

Sep 2026 — Present

AX Engineer · Intern

Identify repetitive internal tasks and automate them with AI.
Improve internal tools and help build chatbots for day-to-day work.

Soongsil Institute for Peace and Unification

Apr 2026 — Aug 2026

Undergraduate Researcher · SmartAI Lab · Pyongsong Social Simulation

Contributed to research using AI to simulate people's behavior.
Built memory, planning, and activity logs for simulated characters.

PROJECTS

EUM · AI Collaboration Workspace

Dec 2025 — Jan 2026

Full-stack Whiteboard Developer · Team of 5

Identified slow whiteboard performance during video calls.
Improved rendering from 23.7 to 58.7 FPS on average in project testing.
Smoothed shaky strokes and reduced data sent during real-time sharing.
Documented the rationale and trade-offs to gain team support for the change.

Remnents of Light / ROLAI

Solo Developer

Unity 2D Action Game · Windows Demo Released

Identified repetitive tasks and friction in developing away from my PC.
Built a chat-driven tool that lets AI implement features and report test results.
Standardized test conditions to make failures and fixes easier to verify.

AWARDS

2026 KOSSCCHTHON · Grand Prize (1st Place) · Doodri

Sole developer of a student experience-sharing platform; teammates owned planning.
Used AI questions to test the plan, then handled technical design and development.
Connected AI to Figma and Notion to keep designs and documentation up to date.

EDUCATION

Soongsil University — School of AI Software — Mar 2026 — Present

KRAFTON Jungle — SW-AI Lab · Cohort 11 — Sep 2025 — Jan 2026

Korea Game Science High School — Computer Game Development — Mar 2023 — Feb 2026

Founded and led Dash, a student development club.

SKILLS

Development	Unity · Next.js
AI tools	Orca · Codex · Hermes
